**G. Born:**

## **Advanced Windows Script Host Developer's Guide**

<b>Introduction</b>	<b>XXIII</b>
The story about this book? .....	XXIII
How to use this book? .....	XXIV
A few other remarks .....	XXV
<b>1 Tools and Techniques</b>	<b>15</b>
A few tips to edit scripts .....	15
How to create a script? .....	15
Edit existing script files? .....	18
Define your own <i>Edit script</i> command .....	18
Script Editors .....	20
EditPlus .....	20
PrimalSCRIPT script editor .....	21
Using Microsoft Script Editor .....	21
Other editors .....	25
The OLE/COM Object Viewer .....	26
Using the Object Browser .....	27
Debugging WSH scripts .....	31
Using a WSH IDE to execute and debug scripts .....	31
<b>2 User Input in scripts</b>	<b>33</b>
User input in VBScript .....	33
User input in JScript .....	36
JScript-user input using a second script .....	36
Internet Explorer for JScript user input .....	39
Implementing an <i>InputBox</i> function in HTML .....	40
Call the function within the HTML document .....	41
The <i>InputBox</i> implementation for JScript .....	42
An <i>InputBox</i> ActiveX control .....	48
<b>3 Using forms</b>	<b>51</b>
User Forms with Internet Explorer .....	51
Creating a Dialog using <i>showModalDialog</i> .....	51
Using Internet Explorer for dialogs .....	56
Creating Forms using Internet Explorer .....	59
The HTML code for the form .....	59

## IV

---

DHTML code to control your form	61
A WSH script to use the form	65
A JScript WSH script to access the form	70
Form input using a <i>CallBack</i> function .....	72
Using ActiveX controls as forms .....	75
Using an ActiveX control for an about dialog box	76
Using the About dialog from a WSH script	82
Using a form for user input .....	84
Creating the form using VB 5 CCE	84
How to define global variables to keep user input values?	89
How to implement the form handling methods?	89
How to use the ActiveX control in a WSH script?	91
Using the form in JScript	92
Implementing a password input dialog .....	93
A WSH script using the password input	95
<b>4      ActiveX controls programming</b>	<b>99</b>
VB 5 CCE the basics .....	99
What is VB 5 CCE?	99
Create a new ActiveX-Project	101
Introduction into VB 5 CCE .....	102
About projects, classes, modules and properties	102
The code window	105
The properties window	107
Inserting controls into a Form	109
Creating an OCX file .....	110
Create an install file for an ActiveX control	113
How to get information about objects? .....	114
Create an object description for the object browser	115
A project sample .....	116
ActiveX samples .....	119
Implementing the <i>WSHKeyExist1</i> method .....	119
A Wait method for Scripts	123
A method to play sounds within a script	129
<i>WSHShell</i> - and <i>WSHAppActivate</i> methods .....	134
Implementing the <i>WSHShell</i> method	135
Implementing the <i>WSHAppActivate</i> method	137
Testing <i>WSHShell</i> and <i>WSHAppActivate</i>	139
The <i>SendKeys</i> problem .....	140

---

Implementing a <i>WSHSendKeys</i> method.....	143
Remarks about the <i>WSHSendKeys</i> method	143
Remarks about the <i>WSHSendKeys</i> implementation	146
Sample 1: Launch and terminate <i>Calc.exe</i>	147
Sample 2: Manipulating two applications using <i>WSHSendKeys</i>	150
Sample 3: Clipboard handling using <i>WSHSendKeys</i>	153
Using <i>WSHSendKeys</i> to create a new user account .....	157
How to handle windows?.....	165
The <i>WSHFindWindow</i> method	166
The <i>WSHIsWindow</i> method	167
The <i>WSHIsIconic</i> method	168
The <i>WSHShowWindow</i> method	170
The <i>WSHSetForegroundWindow</i> method	173
The <i>WSHMoveWindow</i> method	174
The <i>WSHFlashWindow</i> method	175
Sample 1: Manipulate a window	177
Sample 2: A moving and flashing window	179
Shutdown Windows 95/98 using a script.....	183
A script using the <i>WSHExitWindows</i> method	185
<b>5       WSH and Microsoft Office</b>	<b>189</b>
Using Microsoft Excel .....	189
The Excel object model	189
A sample to access Excel	190
Set the window properties	191
The implementation in VBScript	193
An implementation in JScript	194
Create an Excel worksheet and add the content	196
The VBScript implementation	199
The JScript Implementation	202
Writing WSH information into a worksheet	204
The VBScript Implementation	206
The JScript implementation	209
Load an Excel XLS file and read the data	212
Implementing the sample in VBScript	214
An implementation in JScript	215
Importing a CSV file in Excel	217
How to import CSV files into several columns?	220
Using Microsoft Word.....	226

---

## VI

---

The Word 97 object model	226
Sample 1: Access Word from a script	227
How to implement the sample in VBScript	230
The JScript implementation	232
Create a Word document and write data	234
The implementation in VBScript	237
The JScript Implementation	239
Read data from a Word DOC file	242
How to use the Word <i>Open</i> dialog	245
Using Microsoft Access.....	248
The Microsoft Access 97 object model	248
The <i>DBEngine</i> object model	248
The <i>Workspace</i> object	249
The <i>Database</i> object	250
Working with Access Databases	250
Using Outlook.....	255
The Outlook object model	256
Create an E-mail entry in Outlook	257
Create a new contact	261
Create a new note	263
Create a new task entry	264
<b>6      Using ActiveX Data Object (ADO)</b>	<b>267</b>
A few basic .....	267
ADO versions and libraries	267
The ADO object model.....	268
How to get data from a data source?.....	270
Step 1: Using the <i>Connection</i> object	270
Connecting to a SQL server	271
Using an ODBC driver as a connector to a data source	272
How to create a DSN?	272
Step 2: Create a <i>Recordset</i> object to access the data source	274
ADO samples.....	276
Sample 1: Read data from a table of an Access data base	277
Using WSF files to include the ADO constants	281
Sample: using SQL queries and filter commands	283
Updating a table using ADO commands.....	289
Browsing all records within a Recordset	295
Sample: Read data from a CSV file .....	296

---

Sample 2: Read data from a Text file	299
<b>7 Using Active Directory Services Interface (ADSI)</b>	<b>303</b>
A few basics.....	303
What is Active Directory Service?	303
What are Active Directory Service Interfaces?	305
How to bind to a directory service?	305
Binding to a domain	307
Binding to a remote computer	308
The first ADSI samples.....	309
How to retrieve a list of supported providers	309
How to get the ADSI version?	310
List items in a domain/on a machine .....	312
Enumerate children of a container object	312
Enumerate the children of a container object by classes	315
Sample 2: Enumerate schema computer	322
How to list computer properties?	326
Dealing with domains, groups and users .....	329
How to list all groups?	329
How to list all domains in the Active Directory?	331
How to list all user accounts?	332
Unimplemented features	334
How to create a user account?	335
How to change a users password?	337
How to change a user's description?	338
How to disable a user account?	338
How to force password input?	338
How to set a password expiration?	339
How to unlock user accounts?	339
How to read user properties?	339
How to set user flags?	342
How to delete a user account from a machine or a domain?	343
How to add a user to a group?	343
How to remove a group member?	344
How to list all members of a group?	344
How to create groups?	345
How to remove groups?	346
How to list all groups in which a user is member?	347
Deal with services .....	348

---

## VIII

---

How to enumerate all services on a computer?	348
Start, Stop and Pause services	351
Alter file shares .....	353
<b>8      Microsoft Windows Management Instrumentation Scripting (WMI)</b>	<b>359</b>
An Introduction .....	359
What's WBEM?	359
... and what's WMI?	360
WMI Scripting Interface .....	361
WMI Scripting Object Model .....	362
SWbemLocator Object	362
SWbemSink Object	363
SWbemServices Object	363
SWbemEventSource Object	364
SWbemObject Path Object	364
SWbemNamedValue Object	365
SWbemNamedValueSet Collection	365
SWbemObject	365
SWbemObjectSet Collection	366
SWbemLastError Object	367
SWbemQualifier Object	367
SWbemQualifierSet Collection	367
SWbemProperty Object	367
SWbemPropertySet Collection	368
SWbemMethod Object	368
SWbemMethod Collection	368
SWbemSecurity Object	369
Terms used in WMI .....	369
How to obtain information about the CIM hierarchy? .....	370
Retrieving information about the system .....	371
Querying WMI properties	372
A sample to EnumerateClasses	376
Retrieving a few system information about a machine	380
How to read memory settings using WMI?	385
Using ExecQuery to retrieve memory information	388
Displaying available and free memory	390
How to deal with object instances?	394
Retrieving BIOS data using WMI	396
How to retrieve the IP Address	398

---

Working with Disk data.....	400
A sample showing data of a given disk	400
How to get help about a class?	402
How to change the volume name of a disk?	403
How to filter all disk drives with low free space	404
Dealing with processes and services.....	406
How to list all running processes	406
Execute and terminate processes on a machine .....	409
Sample to kill a process	413
How to list all running services	415
Start and stop a service using WMI	419
How to shutdown or reboot a machine?	421
Handling Events using WMI .....	424
Read the event log file	424
Listen for NT Event Log Events	428

**Index431**
